Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 30-48, drawn to method of detecting a target molecule.

Group II, claim(s) 49-54, drawn to a disc; and claim 58, drawn to a kit comprising said disc.

Group III, claim(s) 55-57, drawn to method of preparing a disc.

Group IV, claim(s) 60-63, drawn to a detection device.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group I can be practiced with a disc fashioned of any suitable substrate, nitrocellulose, whilst the disc of Group II, e.g., claim 51, is that which contains binary information, i.e., a compact disc or CD. Accordingly, the inventions are not so linked by a special technical feature such that they have unity of invention.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

4. The species are as follows:

- a. In the event that applicant elects the invention of Group I, applicant is required to elect between:

- i. Claim 31, drawn to nucleotides; and
- ii. Claim 32, drawn to antigen-antibody pairs.

Claims 30 and 33-48 are generic.

- b. In the event that applicant elects the invention of Group II, applicant is required to elect between the non-cleavable and target molecules set forth in claim 50. Claims 49 and 51-54 are generic.

5. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species of Group I and II are drawn to different chemical compounds that have different properties and have been known in the art.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley L. Sisson whose telephone number is (703) 308-3978. The examiner can normally be reached on 6:30 a.m. to 5 p.m., Monday through Thursday.
10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, W. Gary Jones can be reached on (703) 308-1152. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9307 for After Final communications.
11. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
